DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species I: Figures 3 and 24. Discloses the 1st, 2nd and Select line transistors as well as the Reset and Integration Capacitors;
- Species II: Figures 18 and 32. Discloses the 1st, 2nd, Switching and Select line transistors as well as the Reset and Integration Capacitors;
- Species III: Figures 13 and 29. Discloses the 1st, 2nd, Amplification and Select line transistors as well as the Reset and Integration Capacitors;
- Species IV: Figures 11 and 28. Discloses the 1st, 2nd, Initialization, Amplification and Select line transistors as well as the Reset and Integration Capacitors;
- Species V: Figures 15 and 31. Discloses the 1st, 2nd, Switching, Amplification and Select line transistors as well as the Reset and Integration Capacitors;
- Species VI: Figures 14 and 30. Discloses the 1st, 2nd and Select line transistors as well as the Reset Capacitor (No: Integration Capacitor);
- Species VII: Figure 35. Discloses the 1st, 2nd and Select line transistors (No: Reset Capacitor or Integration Capacitor);
- Species VIII: Figure 19 and 33. Discloses the 1st, 2nd, Amplification, Initialization and Select line transistors as well as the Integration Capacitor (No: Reset Capacitor);

Art Unit: 2615

- Species IX: Figure 6, 22, and 25. Discloses the 1st, 2nd and Select line transistors as well as the Integration Capacitor (No: Reset Capacitor); and
- Species X: Figure 21 and 34. Discloses the 1st, 2nd, Amplification and Select line transistors as well as the Integration Capacitor (No: Reset Capacitor).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2615

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
